

Moonshot is a galactic bounty hunter and baker. She was born with the ability to communicate with all living things and can breathe in space. Daughter to Mr. A and The Shell, she possesses super strength, exceptional intelligence, and the family's natural instinct for fighting against evil. Moonshot has her own spaceship and station that freely moves about the Milky Way Galaxy. When she is not beating up bad guys, Moonshot explores outer space for key ingredients from different planets. Her dream is to uncover the mysteries of the universe through baking! She works with her trusty sidekicks, Raspberry the Red Panda, Jasmine the Cat, and Mr. Oven to gather ingredients and invent new recipes. She also has space rings that allow her to teleport freely and reach far distances. Luna is an artificial intelligence assistant that Moonshot received from the best programmers on Earth as a reward for her bravery. Luna enables Moonshot to connect with her family and friends back at home. She only visits Earth about three times a year, and is one of the only people stopping otherworldly villains from threatening her home planet. Moonshot is the younger sister to Master Freeze. Her birthday is October 26!
